

# ZIGZAG CLASSIFIER

For food stuff industrie and herb processing

The Zigzag classifiers permit precise separations in the range from approx. 0,1 - 10 mm with throughputs up to 5000 kg/h depending on the models  
The cut point is easily and steplessly ajustable by means of a throttle flap.

## Features :

- Precise separations, even in case of overload
- Nearly maintenance-free
- No constant supervision
- economical

## Fields of application :

- Separation of bulk products
- Separation of products with the same particle size but different bulk densities
- Cleaning and classification of herbs, spices, seeds
- Separation of oleaginous fruits

Our test center is on your disposal
