

ZIGZAG CLASSIFIER

For Mineral Industrie, Recycling, Plastic, ...

The Zigzag classifiers permit precise separations in the range from approx. 0,1 - 10 mm with throughputs up to 5000 kg/h depending on the models
The cut point is easily and steplessly adjustable by means of a throttle flap.

Features :

- Precise separations, even in case of overload
- Nearly maintenance-free
- No constant supervision
- economical

Fields of application :

- Separation of bulk products
- Separation of products with the same particle size but different bulk densities
- Removal of foreign bodies
- Separation of precious metals (copper, aluminium, lead, etc. from insulation material of cut cables
- Dedusting of granules, coke, fertilizers, etc.
- Separation of plastics
- Separation of mineral material, ex. feldspath, mica, ...
